ECONOMIC REVIEW:

Significant economic developments took place during the month of December-2022. Pakistan paid US\$1bn Eurobond payment dispelling fears of a default in near term. This takes SBP's foreign exchange reserves to US\$5.8bn as of Dec 23, 2022 as compared to US\$7.7bn in Nov 2022. The SBP also increased LTFF and EFS rates by 2% to 13% which have been a key demand of IMF to reduce concessionary rates.

Trade deficit during Dec'22 increased by 2% MoM to US\$2.9bn as per Pakistan Bureau of Statistics (PBS). This was led by decline in exports which reduced by 4% on MoM basis to US\$2.3bn. Imports during the month remained flat at US\$5.1bn. Pakistan's CAD in Nov 2022 clocked in at US\$276mn vs. US\$569mn in Oct 2022. This could increase on sequential basis going forward due to up-tick in trade deficit and expected slowdown in workers remittances. However, on full year basis, CAD is likely to remain well within SBP's FY23 target.

CPI for the month of Dec 2022 clocked-in at 24.47% YoY. This takes 1HFY23 average inflation to 25.02% compared to 9.81% in 1HFY22. The YoY in CPI uptick was led by Food (35.5% YoY), Transport (41.2% YoY), Housing (6.9% YoY), Restaurants (27.4% YoY), Alcoholic Beverages & Tobacco (36.2% YoY), House Hold Equipment (29.2% YoY), Miscellaneous (25.8% YoY), Recreation & Culture (38.5% YoY) and Clothing & Footwear (17.1% YoY).

Pressure on FX reserves remain a key concern for the country, however, rollover of bi-lateral debt including Saudi Arabia/China and ease in commodity prices could provide some relief to country's FX reserves going forward. Furthermore, conclusion of ninth IMF review will remain key in supporting the overall reserves of the country as it will pave way for release of over US\$1bn tranche to the country. Pakistan has gradually started taking steps that meet IMF conditions and it is likely that it will result in completion of IMF program.

MONEY MARKET REVIEW:

In the month of December'22, secondary market yields across short-term papers mount up slightly on inflation concern, economic instability & political uncertainty.

Yields on short term papers increased on average 4 bps, which set the yields on 3m, 6m and 12m papers at 16.69%, 16.99% and 17.00%, respectively. On the other hand, yield on long term bonds increased (average 46 bps MoM) with 3yr bond settling at 15.64%, while yield on 5yr and 10yr bond yields increased to 14.61% and 13.70%, respectively.

T-bill auctions were conducted during the month, the target for the auctions was PKR 2 trillion against which the total amount of PKR 1.943 trillion was raised by SBP. The amount maturing during the period was PKR 2.077 trillion.

EQUITY MARKET REVIEW:

KSE 100 index registered a fall of 1,928pts (i.e., 4.55%) MoM to settled at 40,420pts. The declining trend was primarily attributed to political turbulence, S&P lowered the long-term sovereign credit rating of Pakistan by one notch to “CCC+” from “B” and short-term rating to “C” from “B” to reflect the continued weakening of Pakistan’s external, fiscal and economic metrics.

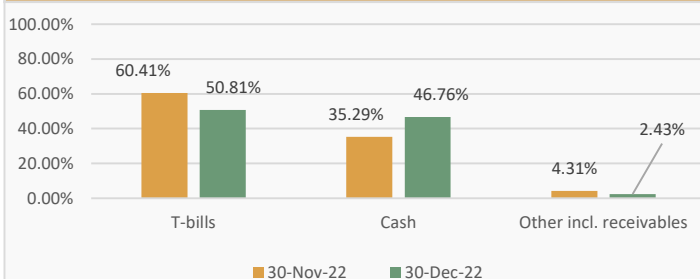

Furthermore, during the month PKR depreciated by 1.11% to record at PKR 226.68 / USD, Forex reserves fell to USD 5.58 bn and delay in IMF 9th review dampened the investors’ confidence. The average volume of KSE-All Index decreased by 13% MoM to 181mn shares. The market capitalization of KSE-All index decreased by 3.97% MoM to USD 28.6 bn.

During the month foreigners were net seller of USD 34mn. The major selling was observed by Foreign Corps. (USD 60.69mn), while overseas Pakistanis were net buyer with USD 26.50 mn. On local side Bank/DFI and Companies were major buyers and purchased equities worth USD 43.88mn and USD 13.16mn respectively. Net selling of USD 14.05mn by Mutual Funds was witnessed during the month
